

Contents

1	Introduction	5
2	Means	11
2.1	Greek means	11
2.2	Definition and properties of means	14
2.3	Comparison of means	17
2.4	Weak relations and symmetric angular relations	18
2.5	Weighted Greek means	21
2.6	Angular relations	27
2.7	Operations with means	32
2.8	Invariant and complementary means	34
2.9	Partial derivatives of means	51
3	Double sequences	55
3.1	Measurement of the circle	55
3.2	Heron's method of extracting square roots	60
3.3	Lagrange and the definition of the <i>AGM</i>	61
3.4	Elliptic integrals	65
3.5	Gaussian double sequences	68
3.6	Determination of <i>G</i> -compound means	72
3.7	Rate of convergence of <i>G</i> -compound means	74
3.8	Archimedean double sequences	77
